

NEXUS

MWG (potential) Topics

- Reliability & Test: active (coord: Andrew Richardson)
- Design Modelling Simulation: active (coord: Patric Salomon)
- Packaging & Integration: not active
- Equipment & Processes: not active

Notes from 29 Nov 2006, NEXUS FP7 Workshop: Work group on MWG topics

Chair: Andrew Richardson

Notes: Patric Salomon

NEXUS

Challenges in running MWGs

Involve users from industry (that are not part of NEXUS so far)

Ideas:

- **Complementing ETPs on horizontal issues, e.g. EPoSS**
- **Prepare for FP7 calls: MWG would not form a project but provide skilled partners to application oriented IPs or STREPs**
- **Marketing (use flyers, presentations, newsletter, etc)**
- **Attend meetings of MNT user communities and present skills there (workshop or booth) → this also for the upcoming NEXUSplus FP7 workshops!**
- **Use/organise one-to-one brokerage meetings**
- **Inventory of capabilities of MWG partners -> slide/database**
- **Collaborate with other networks and (co-)offer their services**
- **Give visibility to MNT companies**
